

K-love serves my family through providing quality programming that is uplifting encourageing and wholesome for all ages. As we travel throughout Colorado, we can recieve continuous signal through the "repeater" system that is currently in place. I can only imagine the distcouragement that will be felt throughout much of cColorado and muchof rural America that will lose their K-love signal. In many of these communities it is the only option to receive programming such as this. K-LOVE's programming is in the public's best interest in providing parenting and marriage tips throughout its daily programming. By helping parents be better parents and keeping families whole serves only to strengthen the community and our nation. The costs of broken families and behavioral correction by the stste later in life, drain this country and individual communities of resources that could best be used to enhance the lives of countless others. This system(K-LOVE) is imperative to the keeping America the light of Freedom to the rest of the world.
